

After manually upgrade to autonomy7.6, there are some configuration changes needed for running it correctly.

1. Changes to IDOL.cfg

(1) SetItaliLanguageFields change to SetItalianLanguageFields

This is a misspell problem

(2). Remove the comment of SentenceBreaking=japanesebreaking

(3). For all the language definition, remove all other encoding and language, remain UTF8 only.

Example

[japanese]

Encodings=UTF8:japaneseUTF8

(4) please don't define "+" in the **TangibleCharacters**

2. Changes to FSF.cfg

(1).add ImportEmptyFiles=false

(2).remove comment of QueryPort, and give it correct port number(9000 by default)

(3).remove comment of IndexPort, and give it correct port number(9001 by default)
